DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-6, drawn to a three-dimensional textile composite structure, classified in class 428, subclass 180.
- II. Claims 7-12, drawn to a process for manufacturing a textile composite structure, classified in class 264, subclass 219.
- III. Claim 13, drawn to an energy-absorbing door, classified in class 296, subclass 146.1.
- IV. Claim 14, drawn to a safety headwear, classified in class 2, subclass 410.
- V. Claim 15, drawn to a body protective gear, classified in class 2, subclass 456.
- VI. Claim 16, drawn to a protective package, classified in class 206, subclass 521.
- VII. Claim 17, drawn to a seat cushion, classified in class 5, subclass 653.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I, III-VII are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed in Inventions I and III-VII can be made by another and materially different process without the steps of the Group II process i.e. heating the laminate to a processing temperature higher than the melting temperature of the thermoplastic matrix

Application/Control Number: 10/791,280

Art Unit: 1772

material but lower than the melting temperature of the non-woven textile material, applying

pressure to the heated laminate, molding the non-woven textile material etc.

Inventions I and III-VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because they are drawn to a three dimensional textile composite structure, an energy-absorbing door, a safety headwear, a body protective gear, a protective package, and a seat cushion. The unrelated inventions as claimed are independent since they are not connected in design, operation or effect, i.e. each invention is separately usable and the operation, design and effect of one is independent of the other.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to John Holman on 2/3/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Application/Control Number: 10/791,280

Art Unit: 1772

application. Any amendment of inventorship must be accompanied by a request under 37 CFR

1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Catherine Simone whose telephone number is (571)272-1501. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on (571) 272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
